Tissue Ply Pad

Consistency, Strength, Durability and Variety.

What you need to dress your meat case.

RETAIL TRAYS

- Cryovac® foam trays deliver consistent quality in weight, color, count and machinability.
- Their combined strength, durability and variety are unsurpassed.
- Available in a range of stock sizes and colors including white, blue, green, yellow, charcoal and rose.

ABSORBENT PADS

- Cryovac Dri-Loc® Pads enhance the appearance of in-store packaging.
- Dri-Loc® Pads can color match each Cryovac tray offering.
- They are designed to provide maximum absorbency for meat, fish and poultry products.
- These unique pads are perforated with hundreds of tiny one-way valves, so juices are absorbed only from the bottom of the pad, keeping the meat from drying.
- To help reduce shrink, Cryovac Dri-Loc® Theft Sensor Pads electronically detect any merchandise not paid for as it is removed from the store.

Fresh and Moisture Free.

Would you send your products to retail any other way?

PROCESSOR TRAYS AND PADS

- With Cryovac® trays, Dri-Loc® pads and Pad-Loc™ Superabsorbent (PLS) Processor Pads, products look fresh and appealing in the retail display, attracting impulse buys and improving customer satisfaction.

- They have the strength to withstand the most rigorous packaging demands.

- PLS Processor Pads feature a unique

- multi-layer, sealed-edge design that eliminates excess moisture, even when displayed shingled.

- The pads' design reduces in-store rewraps and absorbs purge without drying the meat.

- With sealed edges, ply separation and tissue creep are virtually eliminated.

Cryovac® pre-padded trays are available with any of our absorbent materials to meet specific packaging needs.

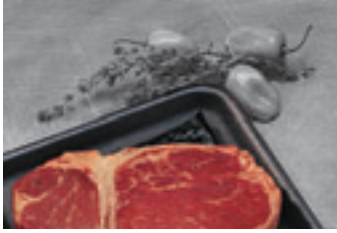

A Half Century of Leadership and Innovation.

For more than 50 years, Sealed Air has been on the cutting edge, developing high performance systems for packaging perishable foods. Everyday we put that experience to work for you through technological advances, food science innovations, marketing expertise and superior customer service. Cryovac® foam trays, absorbent pads and case liners are regarded as the food industry's finest. And like all of our products and systems, they're backed by our commitment to maintain a leadership role in serving your packaging needs.

Unique and Appealing.

Consider Sealed Air your one-stop shop for delivering a full range of Cryovac® tray and absorbent materials. With our long history of innovative solutions and technology, you'll soon realize how we can fulfill all of your integrated packaging needs.
